Professional Summary

Data Engineer with 3 years of experience in designing, developing, and managing large-scale data pipelines. Skilled in **SQL, Python, Spark, Hadoop, and ELT** processes, with experience using Azure, and Databricks platforms. Contributed to the Digital Twin project, integrating multiple data sources to improve business operations, which won the Economic Times DataCon Award 2024. Focused on applying technology to solve data challenges.

Skills

Programming Languages: SQL, Python

Big Data Technologies: Spark, PySpark, Spark SQL, YARN, Hadoop, Hive, Kafka, Spark structured streaming

Database Solutions & Warehousing: MySQL, MSSQL Server, Data Lakes, Data Warehousing, ETL/ELT, Stored Procedures

Cloud Platforms: Azure Data Factory(ADF), Azure Synapse Analytics, Azure Data Lake Storage(ADLS), Databricks

DevOps & Tools: Azure DevOps, CI/CD, GitHub, Airflow

Key Competencies: Data Pipeline Development, Data Warehousing, Data Modeling, Performance & Cost Optimization, Data Mesh

Experience

Reliance Jio

Data Engineer

April 2023 – Present

- Designed and deployed scalable data pipelines using **Azure Synapse Analytics** and **Azure Data Factory**, enabling real-time and batch data processing for analytics, with optimized data modeling for storage and retrieval.
- Processed large-scale datasets, optimized SQL queries and Spark jobs by refactoring code, **improving data processing speed by 15%** and saving 20+ cloud compute hours monthly.
- Integrated multi-source data (inventory, customer, media, sensor) from **Azure, Oracle, MySQL, ODBC, and HDFS** in formats like Parquet, JSON, and CSV, managing millions of rows daily in **Azure Data Lake Storage (ADLS)**.
- Automated failure alerts via Azure Logic Apps, reducing manual interventions by 25% and enhancing pipeline reliability.
- Worked on a near real-time (NRT) SAP data ingestion PoC using **Spark Structured Streaming**, reducing latency and boosting data availability.
- Authored detailed documentation and mentored junior engineers, delivering training to streamline onboarding and knowledge sharing.

Associate Data Engineer

July 2022 – April 2023

- Built and maintained automated ETL pipelines with **Hadoop, Hive, and Kafka**, ingesting gigabytes of data daily for business analytics.
- Automated workflows for multiple use cases using Airflow and Unix shell scripting, transforming and loading data from diverse sources into **data warehouses**.
- Resolved critical pipeline issues with rapid production fixes, leveraging KEDB style document to reduce downtime by 25%.
- Led 12-15 use cases including Hortonworks Data Platform (HDP) to Cloudera Data Platform (CDP) migration, managing end-to-end data workflows from ingestion to transformation.

Education

University of Pune (SPPU)

Bachelor of Engineering in Electronics and Telecommunication

CGPA: 9.26

Pune, Maharashtra

August 2018 – June 2022

Certifications & Achievements

- Microsoft Certified: Azure Data Engineer Associate (**DP-203**) [↗](#)
- Microsoft Certified: Azure Fundamentals (**AZ-900**) [↗](#)
- Microsoft Certified: Azure Data Fundamentals (**DP-900**) [↗](#)
- Star Performer FY23-24
- ET Edge – DataCon Awards 2024 : Project Digital Twin
